Hunting Outfitter Operation Plan for Private Land Use

Legal Description of private lands with authorizations to operate may be provided via Township, Range, and Section OR by GEOCODE. If operating in an area smaller than a whole section, you must report down to the first quarter section. If operating in an area smaller than the first quarter section, you must report down to the quarter section of the first quarter section. Not all smaller parcels will have an individual geocode and will require the outfitter to report via Township Range Section and aliquot parts to comply with board rule. However, we do not go smaller than quarters of quarters, such as parcel or lot. A geocode in Montana is a 17-digit number that identifies the property's county, township, range, section, and quarter section can be identified.
