

## Continuing Education Application For Bruno Independent Living Aids, Inc.

**Course Outline:** Included is a list of twelve (12) training modules (classes) required for the student to obtain a Certificate in the installation and troubleshooting of Bruno stairlifts and Vertical Platform Lifts (VPL).

**Description of who should attend:** Bruno accessibility dealer technicians are our target audience. Each student must be invited and therefore approved to take this on-line training. Approval is based on prior attendance to Bruno's ACT program or years of experience.

**Qualifications of Instructors:**

**Ron Dries:** Education; Electronics Technology Degree, Computer Programming Degree- Waukesha County Technical College, 30 years' experience in the accessibility industry with more than 20,000 hours of field service, installation, management and training of stairlifts, platform lifts – incline and vertical, and residential elevators. NAEC CAT-S certified

**Luke Bebeau:** Over 24 years of experience working with people with disabilities. He is certified by RESNA as an Assistive Technology Professional and has been a trainer since 1998, when he began teaching ad hoc classes in Assistive Technology to Physical Therapist Students at several Universities in Wisconsin. He has been training employees and dealers at Bruno Independent Living Aids, Inc. since 2005
