

Montana Prescription Drug Registry (MPDR) Information for New Pharmacies

Who must report data to the MPDR? All community and mail order pharmacies holding an active Montana license are required to report to the MPDR daily, either controlled substance prescription data or zero report. Institutional pharmacies only need to report controlled substance prescriptions dispensed upon discharge, not controlled medications administered in the facility or zero reports.

*Pharmacies that will never dispense controlled substances can submit a Zero Attestation [Form](#).

How do I report data to the MPDR?

- Register with the PMP Clearinghouse – [PMP Clearinghouse](#)
 - The [Montana PMP Clearinghouse Quick Reference Guide](#) provides registration options with linked step-by-step outlines and demonstration videos.
- Choose your reporting method – refer to the [Data Submission Guide for Dispensers](#) for detailed instructions on each method.
 - Secure FTP
 - Web Portal Upload
 - Manual Entry (UCF)
 - Zero Reports
- Submit controlled substance prescription data or zero report at the end of each business day. Prescription submission errors must be corrected within seven days. (Please see the [Data Submission Guide for Dispensers](#) Section 5.3 Error Correction page 23 for details on error correction)
